

Course:

Websites Development Using HTML and CSS

TOPIC: TABLES. LAYOUT OF WEB PAGES USING TABLES

Task 1

Create a table that looks as follows:

Task 2

Create a page and place periodic table there.

The Periodic Table of the Elements

This periodic table includes the following information for each element:

- Atomic Number:** Located at the top of each element's box.
- Symbol:** The chemical symbol of the element.
- Name:** The full name of the element.
- Atomic Mass:** Located at the bottom of each element's box.
- Electronegativity:** Located at the top right of each element's box.
- Electron Configuration:** Located at the bottom right of each element's box.
- Block:** Indicated by a color-coded background (s, p, d, f).
- Group:** Indicated by a number at the top of each column.
- Period:** Indicated by a number at the left of each row.
- Notes:** A section at the bottom left containing additional information about the table.

Notes:

- Atomic mass values are in parentheses for elements with no stable isotopes.
- Electronegativity values are in parentheses for elements with no stable isotopes.
- Electron configuration values are in parentheses for elements with no stable isotopes.
- Block values are in parentheses for elements with no stable isotopes.
- Group values are in parentheses for elements with no stable isotopes.
- Period values are in parentheses for elements with no stable isotopes.
