

Course:
Websites Development Using HTML and CSS

TOPIC: **FORMATTING WITH THE USE OF CSS**

Task 1

Study main concepts discussed during the lesson.

Task 2

Add an image to the page from the previous task and set its transparency to 80%.

Task 3

Create a page and arrange three horizontal blocks of the same width on this page. In each block, add an image to the top part of a block and text to the bottom one. Lay out the page using flexbox.

Task 4

Lay out the page, arrange several blocks there. Set background color for blocks using all CSS methods of color definition you already know.

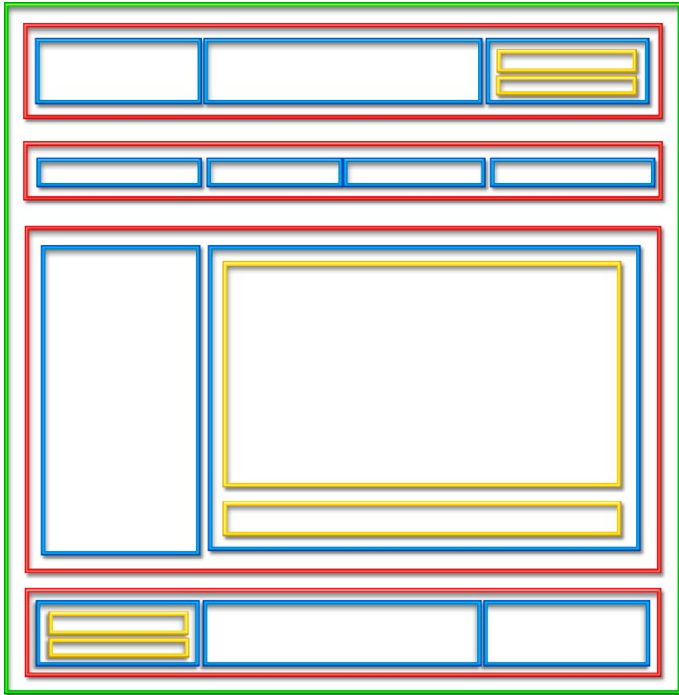

Recommended Resources
