

## Course: Creating Web-pages using HTML5 and CSS3

### Topic: Graphics in Web Design. Graphics Power

**Objective:** Review image insertion through the example of creating a web page.

**Result:** Result of the homework is a created page using graphics files.

**Task:** Example file and source text file are attached to the PDF of this lesson. To access materials, open this lesson in Adobe Acrobat Reader. Use only relative addressing when inserting images. All images are in different folders, do not move them. The part 1\HTML\pageHTML folder contains the index.html web page. The code should be in it, do not move the folder. Folder are arranged so that you could use all options of relative paths. You should end up with this page:

#### Five reasons to visit Greece: Crete, Santorini, Rhodes, Corfu, and Kos

Modern tourists are not surprised with myths, therefore Greece comprehensively develops tourism infrastructure on the mainland and island territories. Dmitry ARUTYUNOV, CEO of “Art Tour”, on the prospects and potential of the Greek resort as we approach the hot season. >>>

#### Fashion trends in tourism: “TEAm Up Festival”

On average, a person drinks 150 liters of tea in a year. Despite the impressive history of tea, the reasons for the high popularity of this drink remain a mystery to this day. To learn them and figure out what tea is, how and when to drink it, the Foresta Tropicana Hotel team decided to hold the TEAm Up Festival - a kind family holiday over a cup of tea. >>>
