

Course: Creating Web-pages
using HTML5 and CSS3

Topic: Hyperlinks. Map Tag

Objective: Create a website containing an image gallery using the map tag.

Task:

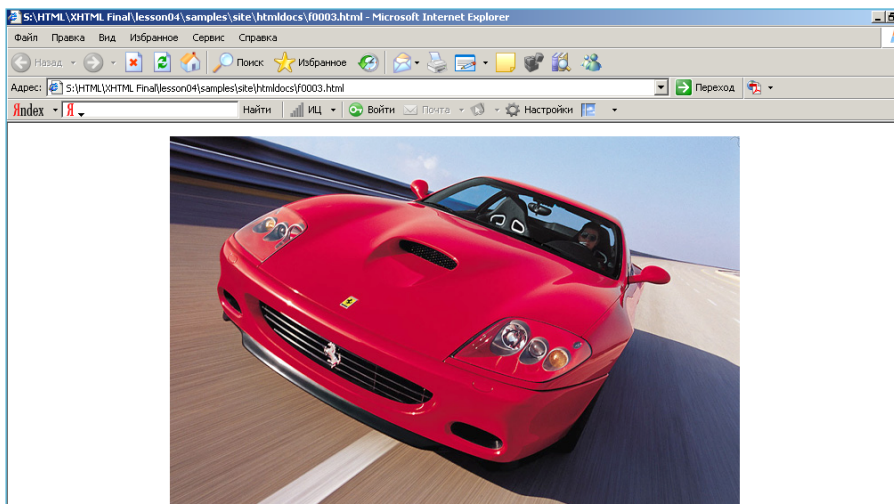

1. **Main page** should be named index.html. It should contain menu. Links should lead to various galleries.
2. **Interior page.** By clicking on one of the images on the main page, you should get to the interior page containing Header of the section and thumbnails. Add the possibility to go back to the main page.

Example:

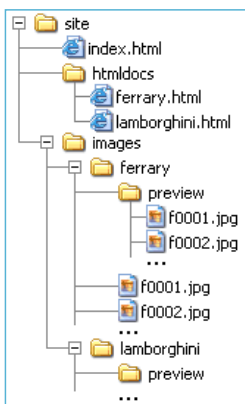

3. **By clicking on the thumbnail**, large images should open in a new window.

Example:

Example of the site structure:

Note. Thumbnails and large images must be different files.
