Course:
Websites Development Using HTML and CSS

TOPIC: LAYOUT OF WEB PAGES USING BLOCKS

Task 1

Create such layout using block layout.

"My song sounds best in the green wood," said the bird; but still she came willingly when she heard the emperor's wish.	The palace was elegantly decorated for the occasion. The walls and floors of porcelain glittered in the light of a thousand lamps. Beautiful flowers, around which little bells were tied, stood in the caorridors – what with the running to and fro and the draught, these bells tinkled so loudly that no one could speak to be heard.

Task 2

Create a page using block layout that consists of header, body divided into 3 blocks, and footer, style as you please.

Choose from the following topics:

- Cars;
- Flowers;
- Photos;
- Tattoos.
